

Rittal – The System.

Faster – better – everywhere.

More application flexibility

More
application options

Five new sizes have been added to our AX compact enclosure range, to create even more application options.

The 400 and 600 mm high enclosures are available in widths of 800, 1000 and 1200 mm, offering an alternative to bayed enclosure suites for a variety of applications.

Tried-and-trusted AX design principle

Technical features:

- Large, seamless mounting plate
- Double door for easy access
- Eyelets in the rear wall for wall mounting

The wide version of the AX compact enclosure is perfect for applications with limited height, being both space-saving and functional. It follows the tried-and-trusted AX design and offers maximum flexibility and time savings for no-drill interior installation, extensive door installation options, and ample space for cable entry.

AX compact enclosure, sheet steel	Packs of	Model No.
WHD: 800 x 400 x 250 mm	1	1094.000
WHD: 800 x 400 x 300 mm	1	1095.000
WHD: 1000 x 600 x 300 mm	1	1096.000
WHD: 1200 x 400 x 300 mm	1	1112.000
WHD: 1200 x 600 x 300 mm	1	1113.000

Your benefits at a glance:

- Ideally suited for use with logistics applications such as conveyor systems and the like, where the enclosure is installed underneath the machines
- The system of integral enclosure bosses and interior installation rail allows simple, flexible interior fit-out on a 25 mm pitch pattern
- Configuration without machining
- UL conformity is guaranteed as long as Rittal accessory components are used
- Safe, simple earthing concept
