Calculate how much you can save with the Rittal Blue E energy saving calculator!

Calculate and compare energy savings from Rittal's previous cooling models to latest innovation, Blue E Cooling.

Up to 70% savings to be made!

Download Rittal's iPhone app TODAY!

The perfect tool to assist you to create your complete Rittal solution.

The Product Selector tool provides simplicity when choosing highest quality industrial enclosure/climate control solutions and accessories. The Distributor Locator shows you exactly where to go to find them.

Search **'Rittal Industrial Enclosure'** in the app store NOW!

AUSTRALIAN OIL & GAS CONFERENCE FEBRUARY 2014: A Rittal Success!

AOG 2014 was held at Perth Convention & Exhibition Centre on 19th – 21st February 2014. Australasia's largest Oil and Gas Expo saw 450 exhibitors and over 11,000 delegates over the three days. The show brought a steady flow of interested delegates.

Centrally positioned with a stand 36sqm in size, the Rittal stand enjoyed high traffic, meeting with good quality delegates over the three days and provided an excellent canvas to showcase a broad range of solutions.

The event provided an excellent opportunity to build brand awareness, increase our contact database and educate potential customers on Rittal solutions for the petrochemical industry.

Showcase products included Rittal's Hazardous Area Junction Boxes, Mining Field Enclosure and Blue E Climate Control. Rittal's Data Centre in a box proved the star attraction. Perfect for SME's the concept combines a rack, power, cooling and remote management in one sleek, cost effective and energy efficient solution.

From the Field

Massey Uni | Case Study

MASSEY UNIVERSITY

New Zealand's Massey University weathered a series of IT threats in the early 2000s, from data centre failure to malicious actions taken by an aggrieved sub-contractor. These threats led senior management to become increasingly concerned about the university's dependence on its IT systems.

Massey is a true multi-campus university, with campuses in Palmerston North, Wellington and Auckland regions. Though far spread, IT services are strongly centralised. The university recognised that continued IT operation, and indeed general university functions, would be badly impacted in the event of an IT disaster. It was crucial that should disaster strike one campus, all others could carry on as normal.

How did Rittal help solve their IT problem?

Coal will make up 70 per cent of world energy mix: BHP

Source: miningaustralia.com.au

BHP Billiton chief Andrew Mackenzie says more than 70 per cent of the world's energy will be supplied by fossil fuels by 2030 as countries boosted economic growth and pulled people out of "abject poverty".
