Door stay for escape routes – TS 4583.500

created: 03.03.2021 on www.rittal.com/com-en

Product description

Description: In an emergency situation, conventional door stays could block the escape route. The stay is activated automatically by pressure, releasing the door in both directions. In conjunction with 180° hinges, this ensures that no escape routes are blocked by open doors in the event of an emergency.

Supply includes: Assembly parts

Product description

To fit: Enclosure type: TS
Enclosure type: SE
