Edge Data Center configurator – IT 7998.009

created: 13.04.2021 on www.rittal.com/com-en

Product description

Description:	The configurator allows you to compile IT solutions for SMEs and IoT applications, in just a few steps. The Edge Data Centre Configurator offers solutions from 2 to 8 racks in an output range of 1.5 to 5 kW IT load per rack. Only refrigerant-based split cooling units are offered as cooling solutions. At the end of configuration, you can choose whether to send an enquiry directly to Rittal, or have the configuration sent to you as a parts list first.
Benefits:	<ul style="list-style-type: none">Modular and easy to extend data centre solutionFor flexible use in your IT environmentPredefined components for basic power supply, cooling, IT security and monitoringReliable operating conditions with optional mounting in a basic shell, in a security room or in a containerCFD analyses/tests for all cooling load rangesStraightforward planning with configurator
Applications:	<ul style="list-style-type: none">Small and medium businesses and IoT applications, streaming services and mobile data providersFor holding and processing large quantities of data with minimal latency periods and maximum computing performancePrivate cloud applications as site-based (on premises) solution
Technical specifications:	<ul style="list-style-type: none">Network/server enclosures with glazed door and 482.6 mm (19") mounting anglesBasic power distributor with PDU international, basic versionRefrigerant-based split cooling units with 1.5 to 5 kW IT load per rackTested redundancy response
Options:	<ul style="list-style-type: none">Professional power distribution including measurement and monitoring functions.Monitoring of temperature and humidity, access control and automated door openingEarly fire detection systemUPS (uninterruptible power supply)Redundancy for power distribution and cooling solutions
Note on Model No.:	Item is configurable, options available for selection
