FCC Compliance Statement

The devices sold by Rittal North America under the listed trade name and model numbers below comply with Part 15 of the FCC Rules.

Trade name: Chiller Blue e+

Model numbers: 3320200, 3334300, 3334400

Classification:

Digital device	☒	<i>Device or system that generates and uses timing signals or pulses at a rate in excess of 9 kHz and uses digital techniques</i>
Class A	☐	<i>For use in a commercial, industrial or business environment only. No use by the general public or in domestic applications.</i>
Class B	☒	<i>For use in a commercial, industrial or business environment and domestic applications</i>
Type of Radiator	☐ Intended, ☒ Unintended, ☐ Incidental	

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interferences, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
