

VX SE Floormount – FAQs

Will the VX SE Floormount enclosure be available in stainless steel?

- No, the VX SE Floormount enclosures are only available in carbon steel currently.

Will the VX SE Floormount enclosure be available in disconnect (FMD) version?

- No, the VX SE Floormount will only be available in non-disconnect version at this time.

Is the VX SE Floormount enclosure UL listed for Type 12 and/or 3R applications?

- Yes, the VX SE Floormount is both UL Type 12 and 3R listed.

Is the drip shield required for 3R applications?

- No, the drip shield is not required by UL, but it is recommended by Rittal.

Will the VX SE accessories work with the VX SE Floormount enclosures?

- Yes, most accessories will work, but keep in mind that the VX SE Floormount enclosure does not use bottom gland plates and has internal roof, rear wall, and bottom fasteners that utilize a portion of the integrated frame hole pattern.

Are the accessory floor stand kits required?

- No, the VX SE Floorstand enclosures are designed for use with or without floor stand kits.

Do the VX SE Floorstand enclosures accept VX plinths?

- Yes, the standard VX plinths will work with the VX SE Floorstand enclosures.
