

# Rittal – The System.

Faster – better – everywhere.

## NEMA 3R Vented Drive Box

### Ready to Ship. Quick to Install.

Outdoor environments can wreak havoc on electrical controls. The Rittal NEMA 3R Vented Drive Box is a wall-mounted enclosure that protects sensitive electronics from overheating, moisture, dust, and debris, ensuring optimal durability and efficiency with reduced downtime. With integrated cooling, easy fan and filter access, and a tough gasket that's quick to replace, this outdoor enclosure extends the life of your equipment in some of the harshest weather conditions.

Ideal for end users, system integrators, and panel shops, the NEMA 3R Vented Drive Box is an off-the-shelf solution tailored to meet the demands of industries like oil & gas, agriculture, and wastewater. This enclosure is a reliable choice for safeguarding your critical operations thanks to industry-leading technology and trusted, durable construction.

### How the NEMA 3R Vented Drive Box Protects Your Operations:

- Durable Construction: UL Type 3R rated for reliable performance in harsh outdoor conditions
- Integrated Cooling: Fans and filters included for optimal thermal management
- Easy Maintenance: Roof-accessible fans and filter for hassle-free routine checks
- Corrosion Resistance: Superior 3-phase surface finish and silicone gasket for maximum longevity
- Versatile Design: Pre-drilled mounting holes and multiple sizes to fit various applications
- Quick to Ship and Install: The solution is in stock locally and ready to ship to your location with simple installation

### Protect Your Operations Today!

Contact Rittal to upgrade to the Rittal NEMA 3R Vented Drive Box for unmatched electronics protection in nearly any environment.
