

TX CableNet – the take-apart variant

Your go-to network infrastructure solution

The ideal solution for
the tightest of spaces.
Available from stock.

Discover the TX CableNet

With our TX CableNet, we can help you overcome the daily challenges of network infrastructure applications.

Benefit from the fast availability and flexibility of our IT rack, which enables you to respond fast to changing requirements.

The perfect solution for your network infrastructure – even in tight spaces!

Take advantage of our comprehensive range of accessories to configure your very own TX CableNet – tailored to your specific application.

The modular construction also ensures full baying flexibility.

Running cables into and around the inside of the rack is effortless thanks to a spacious roof design and large open floor area in the base. Customised cable routing has never been simpler.

Your benefits:

- Always fits – the take-apart TX CableNet can also be put together in hard-to-access parts of a building
- Customised assembly and fit-out thanks to the construction of the frame with a 25 mm pitch pattern and a comprehensive range of accessories
- Available from stock
- Matching range of 24 and 42 U racks for all your network infrastructure applications
- Vented and glazed rack doors available

Take advantage of our expertise for your network.

Technical features include:

- Handle for profile half-cylinder as an accessory
- Baying of several racks possible
- Full depth adjustability of the 19" rails

The frame can be dismantled, so the TX CableNet can fit through smaller doors, too – the vertical frame parts can be dismantled individually, while the roof and base frames are fully welded.

The necessary flexibility is also provided when it comes to climate control. Do you need active or passive cooling?

The TX CableNet can handle both!

TX CableNet – take-apart variant
