

TX Colo

Break the Limits, Shape the Future

The rack for your colocation data centre.
And from stock.

Standard rack for colocation applications

The world of IT is changing, and the centralisation of IT in large data centres has become a long-term trend. The TX Colo, which is perfectly adapted for use in a large data centre, is our response.

Thanks to its forward-thinking configuration, the TX Colo is ready for immediate use. Integral air baffle plates and a divider panel guarantee optimum air routing, the cable tray makes cable routing easy, and the comfort handles VX, including coded locks, provide greater access protection. What's more, its vented doors make the TX Colo perfectly designed for room climate control.

You can also look forward to effortless cable routing: Roof cut-outs with brush strips across the full depth provide simple cable entry into the rack.
