## Baying system

### Versatile door and side panel concept

**Please note:**

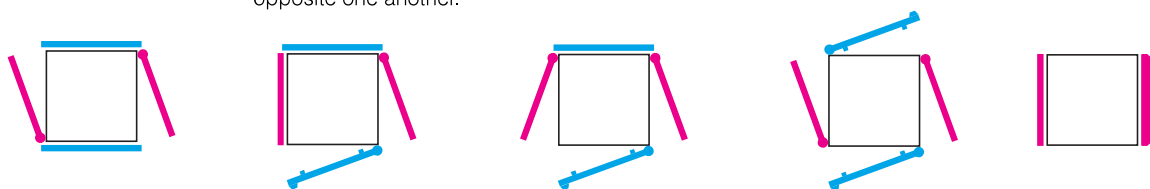

- Red areas (side panels, hinged and unhinged) must always be opposite one another.
- Blue areas (doors/rear panels) must always be opposite one another.

The TS side panel provides new dimensions in convenient access to the TS interior, thanks to the option of hinging.

Only one surface on each vertical enclosure section may be hinged.

**Note:**

Climate control side panels with integral cooling module may be retrofitted instead of an enclosure side panel, see Cat. 33, page 430.

The versatile door and side panel concept also applies to the following baying variants:

### ... infinite possibilities
