# GREATER EFFICIENCY

**The best of everything** – The VX base/plinth is suitable for almost any enclosure application. It combines all the best Rittal plinth functions in a single variable modular system which meets the highest stability requirements. Moreover, the plinth promises ultimate user-friendly assembly, saves time and opens up a whole new range of configuration options.

**Fast, simple and compatible** – The plinth – with its pre-assembled front/rear trim panels – helps to speed up overall assembly and installation while at the same time reducing parts handling and warehousing costs. All parts and accessories are purposefully designed for the VX25 baying enclosure system, and are also fully compatible with Rittal's other enclosure solutions VX25, VX IT, VX SE, TS, TS IT, TP, CX, PC, IW and TX.

# GREATER SPACE

**Create extra space** – The VX base/plinth is more than just a stable and secure enclosure base with space that protects any equipment located there. In fact, it includes the entire base/plinth area underneath the enclosure, e.g. for accommodating cables or for seamless, secure cable routing from enclosure to enclosure.

**Use more of the space, more flexibly** – The option of partially or completely removing the symmetrical trim panels, the universal punchings, and the simplified mounting of the punched sections and rails transforms the plinth into an extra accessory that is totally open and uncovered with greater flexibility for additional installation and configuration of equipment.

IT INFRASTRUCTURE

SOFTWARE & SERVICES

## GREATER ASSEMBLY CONVENIENCE

### Configuration

The system of base/plinth corner pieces with pre-assembled front/rear trim panels and separate trim panels for the depth enables convenient customer-specific configuration of the base/plinth.

### Positioning

The fastening nut slots securely into the punched hole in the base/plinth corner piece and cannot fall out during positioning.

#### Positioning aid

The precise, anti-twist mounting of the plinth on the enclosure is accommodated by a practical positioning aid on the VX25.

#### Integrated base mounting bracket

For flexible fitting to the floor using the locking lug at the side of the corner piece. The lug is positioned such that straight vertical tightening of the screws is possible.

#### Access

The pre-assembled corner pieces and trim panels provide stability and optimum access with simple screw-fastening from the front. The covers clip securely into the corner piece and can be removed at any time, if necessary.

#### Convenient attachment

The enclosure can be screw-fastened into the VX25 corner piece either from above or directly from outside.

## GREATER TIME SAVINGS

### Depth trim panel

The depth trim panel can be attached to the corner piece from both inside and outside. This makes it easy to disassemble and dismantle, even if the enclosure is located against a wall.

### Cable management

Secure cable routing and fixing in the plinth using VX accessories such as punched sections with mounting flange and cable clamp rails saves much time and space.

**Baying**

Baying is easily achieved by laying the depth trim panel flat. Trim panel heights of 100 mm or 200 mm are possible.

**Transportation**

Transportation with a forklift or pallet truck is no problem once the front trim panel has been removed – even when the enclosures are bayed.

VX base/plinth

**Transport castor**

Simple to fit castors ensure time-saving handling and movement.

## GREATER FLEXIBILITY

### Flexible installations

Thanks to punched holes on both sides of the corner pieces and trim panels, the entire base/plinth space can be used flexibly for customer-specific interior fitting and fixings.

### Integrated punched holes

Punched sections and rails can be screw-fastened directly to the trim panels once laid flat. In this way, simple and direct cable routing for several bayed enclosures is guaranteed.

**Multi-use**

Accessories such as cable clamp rails can also be used with an upright trim panel with the aid of the bracket/spacer.

**Second mounting level**

An additional mounting level at the corner piece ensures direct cable entry to the mounting plate.

**Base mounting**

The base mounting bracket allows retrofitting to the floor even if the plinth is already screwed to the enclosure.

**Levelling**

The design of the levelling components compensates for floor unevenness of up to 15 mm, even with fully configured enclosures.

# Base/plinth

## Base/plinth system VX

### Modular base/plinth diversity

The new, innovative base/plinth system VX offers an unprecedented diversity of functions and applications. It combines all existing base/plinth functions in a single solution, as well as opening up many new applications. As if that isn't enough, it is also compatible with existing enclosure solutions VX, VX IT, VX SE, TX, PC, CX console systems and IW. In short, it is a base/plinth system.

The base/plinth system VX comprises the following components:

- Base/plinth corner pieces with base/plinth trim panels, front and rear
- Base/plinth trim panels, sides

The base/plinth system is designed for maximum stability and produces a flush surface in bayed suites. The vented trim panels and trim panels with brush strips available as accessories can also be attached at the sides or exchanged for front/rear trim panels.

Depending on the application, for example, users can dispense with the trim panels between bayed enclosure suites, or a 100 mm or 200 mm high trim panel may be used to stabilise the base/plinth corner pieces.

In combination with its extensive range of accessories, and thanks to its compatibility with enclosure accessories, the base/plinth system VX offers almost infinite possibilities in terms of siting, transportation, cable routing, cable attachment and base/plinth configuration.

One Model No. for the **base/plinth corner pieces with base/plinth trim panels, front and rear**

One Model No. for the **base/plinth trim panels, side**

One complete **VX base/plinth**

Base/plinth height	Basic form	Cable entry options				Stabilisation of bayed base/plinths

### Configuration examples

Order includes	Functional benefits
3 packs of Base/plinth corner pieces with base/plinth trim panels 1 pack of Base/plinth trim panels, sides, 200 mm high	Continuous cable chamber
3 packs of Base/plinth corner pieces with base/plinth trim panels 1 pack of Base/plinth trim panels, sides, 200 mm high 1 pack of Base/plinth trim panels, sides, 100 mm high or 1 pack of Base/plinth trim panels, sides, 200 mm high 1 pack of VX base/plinth baying bracket (8660.140, packs of 20) 4 pc(s). are required for this solution	Additional stability during transportation with base/plinth trim panels rotated through 90°
3 packs of Base/plinth corner pieces with base/plinth trim panels 2 pack of Base/plinth trim panels, sides, 200 mm high	Shielding of the base/plinths from one another

Other options:

- Cable entry at the side by fitting a 100 mm base/plinth trim panel with brush strip
- Cable entry from the rear by dismantling one or more trim panels from the base/plinth corner pieces and replacing them with trim panels with brush strips
- Cable routing in the base/plinth by using punched sections with mounting flanges on the base/plinth trim panels

# Base/plinth

## Base/plinth system VX

### Base/plinth corner pieces with base/plinth trim panels, front and rear

#### Sheet steel

High-load capacity base/plinth corner pieces with moulded self-positioning to the enclosure, may be used with or without trim panels depending on the application. Large openings in the corner piece for optimum access to the screw-fastening point, may be concealed with a plastic corner cover.

#### Material:

- Base/plinth corner piece: Sheet steel
- Base/plinth trim panel front/rear: Sheet steel
- Corner cover: Plastic

#### Colour:

- RAL 9005

#### 100 mm high supply includes:

- 4 base/plinth corner pieces, 100 mm high
- 4 corner covers
- 2 base/plinth trim panels, front/rear, 100 mm high
- Assembly parts

#### 200 mm high supply includes:

- 4 base/plinth corner pieces, 200 mm high
- 4 corner covers
- 1 base/plinth trim panel, front/rear, 200 mm high
- 2 base/plinth trim panels, front/rear, 100 mm high
- Assembly parts

#### Accessories:

- Base/plinth installation bracket, see page 16
- VX support/spacer bracket, see page 17

#### Possible alternative:

- Base/plinth trim panels with brush strip, see page 14
- Base/plinth trim panels, vented, see page 15
- Trim panel attachment for base/plinth trim panels, vented and base/plinth trim panels with brush strip, see page 15

### Base/plinth trim panels with brush strip

#### Sheet steel

For cable entry in the base/plinth. With a base/plinth height of 200 mm, one or two trim panels with brush strips may optionally be used. The trim panels with brush strip may either be fitted at the front, rear or side of the base/plinth corner piece.

#### Material:

- Base/plinth trim panels: Sheet steel
- Brush strip: Plastic, self-extinguishing

#### Colour:

- RAL 9005

#### Supply includes:

- 2 base/plinth trim panels with brush strip
- Assembly parts

For enclosure width/depth mm	Model No.
600	<b>8660.092</b>
800	<b>8660.093</b>
1000	<b>8660.094</b>
1200	<b>8660.095</b>

#### Also required:

- A trim panel attachment bracket for vented base/plinth trim panels and base/plinth trim panels with brush strip is required to be able to attach the trim panels at the sides, see page 15

# Base/plinth

## Base/plinth system VX

### Base/plinth trim panels, vented

#### Sheet steel

For venting the enclosure via the base/plinth. Specifically in applications such as power distribution where the enclosure gland plates are not used, this can be used to achieve a higher air throughput inside the enclosure. Various solutions to raise the roof and special roof plates with vent openings are also available for enclosure venting. With a 200 mm base/plinth height, one or two vented trim panels may optionally be used. The vented trim panels may either be fitted at the front, rear or side of the base/plinth corner piece.

#### Material:

- Sheet steel

#### Colour:

- RAL 9005

#### Supply includes:

- 2 base/plinth trim panels, vented
- Assembly parts for mounting on the base/plinth corner piece

For enclosure width/depth mm	Model No.
600	8660.090
800	8660.091

#### Also required:

- A trim panel attachment bracket for vented base/plinth trim panels and base/plinth trim panels with brush strip is required to be able to attach the trim panels at the sides, see page 15

#### Accessories:

- Base/plinth installation bracket, see page 16
- Filter mat, see page 15

### Filter mat

#### for base/plinth trim panel, vented

The filter mat is simply inserted into the trim panel from the rear.

#### Supply includes:

- 1 pack = 2 rolls, length 2 m each, may be shortened to required length

Packs of	Model No.
1 pc(s).	8620.100

### Base/plinth baying brackets

#### for base/plinth system VX, sheet steel

Required if the 100 mm or 200 mm side base/plinth trim panels are mounted rotated through 90° for additional stabilisation during the transportation of bayed enclosures.

#### Material:

- Sheet steel

#### Surface finish:

- Zinc-plated

#### Supply includes:

- Screws M8 x 16 mm

Packs of	Model No.
20 pc(s).	8660.140

#### Note:

- Required per trim panel: 2 pc(s).

### Trim panel attachment

For mounting base/plinth trim panels, vented and base/plinth trim panels with brush strip in the depth.

#### Material:

- Sheet steel

#### Surface finish:

- Zinc-plated

Packs of	Model No.
4 pc(s).	8660.096

#### Note:

- One pack is sufficient for attaching two trim panels

# Base/plinth

## Base/plinth system VX

### Transport castors

For locating onto the base/plinth corner piece, 100 or 200 mm high.

**Load capacity:**

- Maximum permissible load per twin castor: 1000 N

**Colour:**

- RAL 9005

**Supply includes:**

- 4 twin castors, 2 x with, 2 x without locks

Floor clearance mm	Model No.
100	<b>8660.110</b>

**Accessories:**

- Base/plinth trim panels, sides, for stabilisation, see page 14

### Base mounting bracket

For attaching the base/plinth to the floor. For assembly screws up to 12 mm Ø.

**Material:**

- Sheet steel

**Surface finish:**

- Zinc-plated

Packs of	Model No.
10 pc(s).	<b>8660.100</b>

### Base/plinth installation bracket

For configuring the base/plinth with punched sections with mounting flanges. To fit 100 and 200 mm high base/plinth trim panels and corner pieces.

**Material:**

- Sheet steel, zinc-plated

**Supply includes:**

- 2 installation brackets
- Assembly parts

**Note:**

- For interior installation on upright base/plinth trim panels
- For base/plinth trim panels rotated through 90°, the installation bracket is not needed, because in this position, the system punchings of the base/plinth trim panels may be used directly.

- 1 Installation bracket
- 2 Punched section with mounting flange, 23 x 89 mm
- 3 Base/plinth trim panel, rotated through 90°

For base/plinth trim panel height mm	Packs of	Model No.
100	2 pc(s).	<b>8660.400</b>
200	2 pc(s).	

**Accessories:**

- Punched section with mounting flange, 23 x 64 mm, see page 19

# Base/plinth

## Base/plinth system VX

### Support/spacer bracket VX

For configuring the base/plinth with cable clamp rails or C rails. To fit 100 and 200 mm high base/plinth trim panels and base/plinth corner pieces. The VX support/spacer bracket can also be fastened to the VX25 frame section.

**Material:**

- Die-cast zinc

**Supply includes:**

- 2 support/spacer brackets
- Assembly parts

**Note:**

- For interior installation on upright base/plinth trim panels and base/plinth trim panels rotated through 90° as well as on base/plinth corner pieces.

- 1** VX support/spacer bracket
- 2** Cable clamp rail with right angle section
- 3** Base/plinth trim panel, rotated through 90°

Packs of	Model No.
2 pc(s).	<b>8619.470</b>

**+** **Accessories:**

- Cable clamp rails with right angle section, see page 18
- C rail 30/15, see page 18

### Levelling component

For retrospective levelling on uneven floors at the installation site up to a maximum of 15 mm. Installed through the base/plinth corner piece.

**Benefits:**

- A door offset caused by uneven flooring can be corrected
- Installed on the assembled enclosure, i.e. no need to plan levelling in advance

**Load capacity:**

- Max. admissible load: 2500 N per levelling component (check the load capacity of the floor)

**Supply includes:**

- Assembly parts

For base/plinth height mm	Packs of	Model No.
100	4 pc(s).	<b>8660.120</b>
200	4 pc(s).	<b>8660.121</b>

# Base/plinth

## Base/plinth system VX

### Cable clamp rail

#### Right angle section

For strain relief with cable entry. Depth-variable mounting on a 25 mm pitch pattern on the horizontal enclosure section or in the base/plinth.

#### Material:

- Steel

#### Surface finish:

- Zinc-plated

#### Supply includes:

- Assembly parts
