  - Immediately remove all soiled and contaminated clothing
  - Wash hands before breaks and at the end of work
  - Avoid contact with the eyes and skin
- **Respiratory protection:**
  - In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.
- **Protection of hands:**
  - Protective gloves (EN 374)
  - The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.
  - Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation
  - **Material of gloves**
The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.

**Breakthrough time of glove material**
The exact breakthrough time has to be found out by the manufacturer of the protective gloves and has to be observed.
