# SK 3284.210 - Metal filter for cooling units, climate control door, section door, air-air heat exchangers and chillers

We recommend the use of washable metal filters, particularly in environments with dusty or oily ambient air. If air or steam condenses on the metal surfaces, any particles that may be present will adhere to the metal and are easily washed out with water or grease-dissolving detergents.

## Features

|                     |   |
