SK 3313.540 Liquid Cooling Package

State: 03.06.2024 (Source: rittal.com/bg-bg)

SK 3313.540 - Liquid Cooling Package LCP Inline CW, LCP Inline CWG

Bayed climate control designed for siting within a bayed enclosure suite. The hot air is extracted at the rear of the unit, cooled and then expelled forwards to the cold aisle.

Features

| Model No. | SK 3313.540 |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Design | CW |
| Benefits | Maximum energy efficiency due to EC fan technology and IT-based control |
| | Minimal pressure loss at the air end, which in turn minimises the power consumption of the fans |
| | Optimum adaptability due to dynamic, continuous control of the cold water volume flow |
| | By using high water inlet temperatures, the proportion of indirect |
| | free cooling is increased, which in turn reduces operating costs |
| | Targeted cooling output due to modular fan units |
| | Fan modules configurable as n+1 redundancy |
| | Standard 3-phase connection for electrical redundancy |
| | With redundant temperature sensor integrated at the air end as standard |
| | The separation of cooling and enclosure prevents the ingress of water into the server enclosure |
| | A footprint of max. 0.36 m² for all cooling services |
| | Improved heat recovery, thanks to high water return temperatures when using LCP CW glycol variants, for example in combination with a heat pump |
| | Optimum access for maintenance and servicing from the front and rear |
| | Tool-free replacement of the fan modules |
| Function principle | The hot air is drawn in from the room or hot aisle at the rear of the device and expelled at the front into the cold aisle after cooling. With this product, a raised floor is not necessary. |
| | Sheet steel, spray-finished |
| Colour | RAL 7035 |
| | |

Features

| Options | Direct connection of additional CMC III sensors is supported Racks 2200 mm high |
|---------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Design | Suite cooling |
| Monitoring | Monitoring of all system-relevant parameters such as server air intake temperature, server waste air temperature, water inlet/return temperature, water flow, cooling output, fan speed, leakage Direct connection of the unit via SNMP over Ethernet Integration into RiZone |
| Total cooling output/Number of fan modules | 18 kW/2 27 kW/3 30 kW/4 |
| Air throughput (unimpeded air flow) | At 50 Hz: 5,000 m³/h |
| Number of fans | 2 |
| Dimensions | Width: 300 mm Height: 2,000 mm Depth: 1,200 mm |
| To fit enclosure type | VX IT |
| Installation in bayed enclosure suite | Flush |
| Rated operating voltage | 230 V, 1~, 50 Hz/60 Hz 400 V, 3~, 50 Hz/60 Hz |
| Max. cooling output | 30 kW |
| Type of electrical connection | Connector |
| Duty cycle | 100 % |
| Cooling medium | Water |
| Cooling medium note | Water quality according to unit specifications. |
| EC fan | Yes |
| Fans may be exchanged with the system operational | Yes |
| Temperature control | Linear fan control Two-way control valve |
| | |
