SK 3185.837 - Wall-mounted Blue e+ Dynamic cooling unit 3,412 BTU/h - 8,872 BTU/h

The Blue e+ Dynamic cooling unit series was designed for use in dynamic applications. The enclosures are tested according to DNV-CG-0339 and are especially suited for use on ships (e.g. enclosures in the machine room). Due to the extremely stable mechanical design, the cooling units are suitable for all applications where the device is subject to high vibration loads, such as in ports (crane systems), logistics (storage and retrieval systems) and airports (luggage forwarding systems).
