SK 3311.260 - Liquid Cooling Package LCP Rack CW, LCP Rack CWG

Cooling via high-performance compact impellers. The LCP draws in air from the side at the rear of the server enclosure and blows the cooled air back into the front part of the server enclosure from the side.

Features

Model No.	SK 3311.260
Benefits	Maximum energy efficiency due to EC fan technology and IT-based control Minimal pressure loss at the air end, which in turn minimizes the power consumption of the fans Control of the server inlet temperature Redundant temperature sensor integrated at the air end Optimum adaptability due to dynamic, continuous control of the cold water volume flow By using high water inlet temperatures, the proportion of indirect free cooling is increased, which in turn reduces operating costs Targeted cooling output thanks to modular fan units Fan modules configurable as n+1 redundancy. Standard 3-phase connection for electrical redundancy The separation of cooling and enclosure prevents water from entering the server enclosure A maximum floor area of 0.36 m² for all cooling services Improved heat recovery due to high water return temperatures when using the LCP CW glycol variants, for example in conjunction with a heat pump Optimum access for maintenance and service from the front and the rear Tool-free fan module replacement
Function principle	The LCP draws in the air at the sides at the rear of the server enclosures, cools it using high-performance compact impellers, and blows the cooled air back into the front part of the server enclosure at the sides
Material	Carbon steel, spray finished

Features

Color	RAL 7035
Options	Fully integrated fire detection and extinguisher system Automatic server enclosure door opening Direct connection of additional CMC III sensors is also possible Racks 2200 mm high
Version	Rack cooling
Monitoring	Monitoring of all system-relevant parameters such as server air intake temperature, server waste air temperature, water inlet/return temperature, water flow, cooling output, fan speed, leakage. Direct connection of the unit via SNMP over Ethernet Integration into RiZone
Total cooling output/number of fan modules	40 kW/4 45 kW/5 55 kW/6
Total cooling output	40 kW With one additional fan module, total cooling output increases to 45 kW, with two to 55 kW. A maximum of two additional fans can be installed. 45 kW 55 kW
Air throughput (unimpeded air flow)	At 50 Hz: 8,000 m³/h At 60 Hz: 8,000 m³/h
Number of fan modules in supplied state	4
Dimensions	Width: 300 mm Height: 2,000 mm Depth: 1,200 mm
Suitable for enclosure type	TS IT
Installation in bayed enclosure suite	Flush
Rated operating voltage	230 V, 1~, 50 Hz/60 Hz 400 V, 3~, 50 Hz/60 Hz
Max. cooling output	55 kW
Type of connection (electrical)	Connector
Duty cycle	100 %

Features

EC fan	Yes
Fans may be exchanged with the system operational	Yes
Temperature control	Infinitely variable fan control 2-way control ball valve
Water connections	DN 40 (G 1½" external thread)
Water inlet temperature	15 °C
Protection category IP to EN 60 529	IP 20
Options	Fully integrated fire detection and extinguisher system Automatic server enclosure door opening Direct connection of additional CMC III sensors is also possible Racks 2200 mm high
Packaging unit	1 pc(s).
Net weight	210 kg
Gross weight	235 kg
Customs tariff number	84158200
ETIM 9	EC002515
ETIM 8	EC002515
ECLASS 8.0	27180712
Product description	SK LCP Rack CW, Air/water heat exchanger for rack cooling, Mounted on the side of the rack, flush, Cooling of one up to maximum two racks, Support of IT-compatible, “front-to-back” air routing,

Approvals

Explanations	Declaration of conformity
