## SK 3311.430 - Liquid Cooling Package LCP Inline DX

Ideal for cooling small and medium-sized IT applications. Continuous adjustments of the cooling output provided by output-controlled compressors in the Inline DX LCP (evaporator). An external condenser is required to operate the unit.

#### **Features**

Model No.	SK 3311.430
Version	LCP Inline DX
Benefits	Maximum energy efficiency due to EC fan technology and IT-based control
	Minimal pressure loss at the air end, which in turn minimizes the power consumption of the fans
	Temperature monitoring and control.
	Redundant temperature sensor integrated at the air end
	Due to the speed-regulated compressor, the cooling output adapts
	to the actual requirements
	Special maintenance of the LCP DX due to separation of cooling and server enclosures
	Using LCP DX/FC variants in combination with indirect free cooling
	helps to save operating costs
Applications	Ideal for IT cooling of small and medium-sized locations
	One or two racks can be cooled separately

### **Features**

Function principle	LCP for use within a bayed enclosure suite. Hot air is drawn in from the aisle at the rear of the device, cooled by the high-capacity compact impellers, and blown back into the room or cold aisle after cooling  The LCP DX/FC versions contain both refrigerant as well as a water/glycol heat exchanger. A free cooler is also integrated in the external condenser.  Absorbed thermal energy is emitted to the ambient air at the external condenser location, without heating up the installation room
