| Product description  | Cable duct for concealed cable routing. Easy access to the cabling via the hinged duct covers at any time, optionally removable. The duct has cable entry options to the inside of the enclosure and through the duct's rear wall. The cable retaining bars supplied with the duct can be snapped onto the cable fingers in the duct with variable depth to support the cable routing. Alternatively, the cable duct can be screw-fitted. Can be combined with the brush kit TS IT for optimized air routing. |
| Benefits             | Easy mounting with tool-free quick-release fastening<br>High packing density due to U-based cable routing<br>Suitable for back-to-back baying<br>Cable duct can be used as a partitioning component against air short circuits within a cold aisle containment<br>Lockable cable ducts can be fitted with 1 U mounting standard expansion components                                                                                                                                                          |
