DK 7030.050 - CMC III Power Units

To measure current/energy and to activate/de-activate consumers, such as fans.

Features

| Model No. | DK 7030.050 |
|----------------------|---|
| Product description | The input is switched to the outputs by two relays. In this way, the outputs can be linked with measurements and therefore switched automatically. Fan control is one application example. Manual switching via the CMC III or IoT user interface is also possible. Each output is individually monitored and different values are measured. Cannot be operated with the Processing Unit Compact. |
