# VX 8620.091 - Base/plinth trim panels, vented for base/plinth system VX

For venting the enclosure via the base/plinth. Specifically in applications such as power distribution where the enclosure gland plates are not used, this can be used to achieve a higher air throughput inside the enclosure. Various solutions to raise the roof and special roof plates with vent openings are also available for enclosure venting. With a 200 mm base/plinth height, one or two vented trim panels may optionally be used. Thanks to the complete symmetry of the base/plinth system VX, the trim panels may either be fitted at the front, rear or side on the base/plinth corner piece.

## Features

|                       |   |
