DK 7030.202 - CMC III access control

CMC III unit for controlling and monitoring access to enclosures.

Features

Model No.	DK 7030.202
Product description	CMC III unit for controlling and monitoring access to enclosures. One handle and one reader unit may be connected to one CMC III access control. The handles can be linked to various numerical codes or transponder cards via the CMC III Processing Unit/ Compact website, which means that all the handles connected to a CMC III Processing Unit/Compact can be controlled with just one reader unit. The integral infrared sensor also ensures that the status of the controlled door (open/closed) is monitored.
Function principle	For connecting one handle and one reader unit to monitor a door Integral IR access sensor
Design	Record of every access and each time the door is opened, with user information and time stamp Supports one central reader unit per CMC III system Fixed allocation between handles and reader units Four-eyes principle Central administration of access rights across all systems and locations with RiZone Activating the LED display in the handle
