DK 7979.102 - PDU basic

High-end IT rack power distribution: Robust PDU with compact basic power distribution for the IT environment.

Features

Model No.	DK 7979.102
Design	482.6 mm (19") version
Product description	Compact basic power distribution. Thanks to the PDU basic, any IT rack can easily be equipped with a professional power distribution system. Depending on the PDU design, horizontal mounting in the 482.6 mm (19") level or vertical mounting (including in the zero-U space) is possible.
Benefits	For vertical mounting, it may be attached in the zero-U space of the Rittal VX IT or TS IT rack with no need for tools Colour coding of phases and fuse circuits (L1=pink, L2=black, L3=white) Tool-free divider kit for VX IT
Material	Extruded aluminium section, anodised Slots: Plastic
Supply includes	Connector lock for IEC C14 and C20 connectors Assembly parts No connection cable, to be provided by the customer.

Rittal PDU basic, Model No.: DK 7979.102

Compact power distributor for deployment in IT server and network enclosures. Robust aluminium housing with permanently mounted output slots, IEC 60320/C13 or IEC 60320/C19 as well as CEE 7/3 (earthing-pin) and BS 1363 (UK), depending on the type. (see below for details). The IEC C13 / C19 output slots can be protected with a lock against unintentional removal of the connectors. Unused slots can be closed with slot covers available as accessories. This precludes an unintentional overloading of individual phases an circuits. The fuse circuits and phases are colour-coded for multiphase PDU variants. A connection cable with IEC C20 or CEE connector appropriate for the variant makes the PDU available for immediate deployment.

The warranty for proper operation is 24 months. Technical specifications basic Input voltage range (L/N/PE): 230 VAC, 50-60Hz

input current: 16A

No. of phases: 1
