SK 3240.900 - Blue e+ filter fan with EC technology

The energy-efficient version with EC technology stands out for more than just its unique IoT capabilities. The Blue e+ fan-and-filter unit unlocks countless other advantages, from energy efficiency, to monitoring and sustainability, through to a higher air throughput (175 – 1,160 m³/h).

Features

| | |
|---------------------|---|
| Model No. | SK 3240.900 |
| Design | wall-mounted EC |
| Product description | Blue e+ fan-and-filter units achieve maximum air throughput because they use pleated filters as standard. The wide-range input (100-240 V) supports worldwide use. Activation and monitoring via a Modbus interface supports exclusive features (automatic filter cleaning, filter maintenance display, emergency cooling function). |
| Benefits | Maximum air throughput via pleated filter included in the delivered state Wide-range input 100 – 240 V IoT link enables exclusive features such as automatic filter cleaning, filter maintenance display, emergency cooling function Easy filter changes, thanks to a new opening mechanism on the louvred grille Faster installation on the enclosure with optimised detent hooks Diagonal fan technology achieves more even and constant ventilation of the enclosure, thanks to improved pressure stability Tool-free assembly |
