IT 7998.900 - RDC All-in-One Container

Ready-to-connect IT infrastructure in a robust container shell, as standardised IT modules including UPS module and cooling in a range of output categories for SME, Cloud and Edge applications.

Features

Model No.	IT 7998.900
Product description	Ready-to-connect IT infrastructure in a robust container shell, as standardised IT modules including UPS and cooling in a range of output categories for SME, Cloud and Edge applications.
Benefits	Individual container solutions Predefined data centre container variants Predefined components Project planning and complete documentation of all components Short planning phases and delivery times Complete turnkey system
Applications	SME, cloud and Edge applications All-in-one modules for both small output categories and larger HPC applications, individually designed to accommodate the required heat loss
Function principle	The AIO modules contain the entire infrastructure for the IT equipment, including the uninterruptible power supply Depending on the version, also with integral cooling generation or ready-to-connect for an infrastructure container or conventional infrastructure. In addition to mechanical mounting of the IT equipment in the form of racks, an AIO module also contains the power distribution system, including UPS, cooling systems and monitoring components. Depending on the cooling systems used, cooling generation is also pre-integrated. Cooling generation is supplied separately, depending on the cooling system used.
Packs of	1 pc(s).
Customs tariff number	85480090
