SK 3312.017 - Fan module for LCP Rack/Inline CW

Increased cooling output. Additionally redundancy can be achieved or the electric power consumption can be reduced.

Features

Model No.	SK 3312.017
Product description	To increase the cooling output, individual fan modules may be retro-fitted into the LCPs. Additional integration can also achieve redundancy or reduce the electric power consumption of the LCPs.
Benefits	May be connected with the system operational Tool-free replacement of the fan modules
Function principle	Installing fan modules in an LCP increases the air throughput and hence the cooling output of the chosen variant. With an adequate cooling output, fan modules may be added to create redundancy. Retro-fitting additional fans over and above the required volumetric air flow allows you to reduce the electrical energy consumption, since the fans then operate at a lower speed. At the same time, the noise level of the unit will be significantly reduced.
Supply includes	1 fan unit EC fan Fully wired ready for connection Assembly parts
Packs of	1 pc(s).
Customs tariff number	84145915

Features

ETIM 9	EC000320
ETIM 8	EC000320
ECLASS 8.0	27180716
