SK 3313.570 - Liquid Cooling Package LCP Inline CW, LCP Inline CWG

Bayed climate control designed for siting within a bayed enclosure suite. The hot air is extracted at the rear of the unit, cooled and then expelled forwards to the cold aisle.

Features

Model No.	SK 3313.570	
Design	CWG	
Benefits	Maximum energy efficiency due to EC fan technology and IT-based control	
	Minimal pressure loss at the air end, which in turn minimises the power consumption of the fans	
	Optimum adaptability due to dynamic, continuous control of the cold water volume flow	
	By using high water inlet temperatures, the proportion of indirect	
	free cooling is increased, which in turn reduces operating costs	
	Targeted cooling output due to modular fan units	
	Fan modules configurable as n+1 redundancy	
	Standard 3-phase connection for electrical redundancy	
	With redundant temperature sensor integrated at the air end as standard	
	The separation of cooling and enclosure prevents the ingress of water into the server enclosure	
	A footprint of max. 0.36 m² for all cooling services	
	Improved heat recovery, thanks to high water return temperatures when using LCP CW glycol variants, for example in combination with a heat pump	
	Optimum access for maintenance and servicing from the front and rear	
	Tool-free replacement of the fan modules	
Function principle	The hot air is drawn in from the room or hot aisle at the rear of the device and expelled at the front into the cold aisle after cooling. With this product, a raised floor is not necessary.	
Material	Sheet steel, spray-finished	
Colour	RAL 7035
