Door comfort handle

The handle for TS IT racks is designed with an integrated switching contact as the opener. The system can be used in combination with the CMC III Door Control Module. Triggering of the switch contact is detected by the CMC III Door Control Module, and the solenoids are de-energised so that the door of a rack can be released and/or opened. Prepared for the installation of commercially available semi-cylinders, 40 mm, as well as SZ lock and push-button inserts.

Technical specifications:

Temperature application range:

5 °C to 40 °C

Humidity range:

5% to 95% relative humidity, non-condensing

Rated voltage: 24 V DC

Rated current: max. 3 A

Length: 302 mm.

Colour: RAL 7035
