DK 7979.538 - PDU metered plus

High-end IT rack power distribution: Smart PDU with energy measurement per slot, i.e. output requirement for each individual consumer.

Features

Model No.	DK 7979.538
Product description	High-end power distribution in a compact design for IT network and server racks. With power measurement per individual outgoing slot.
Benefits	For vertical mounting, it may be attached in the zero-U space of the Rittal VX IT or TS IT rack with no need for tools
	Colour coding of phases and fuse circuits (L1=pink, L2=black, L3=white)
	Tool-free divider kit for VX IT
	PDU self-supplied, no external power supply required
	Measurement accuracy ± 1% (kWh) to EN 62 053-21
	Integral real-time clock with battery buffering (max. 10 years, batter replaceable)
	Integral electromagnetic buzzer for acoustic alarms
	Adjustable limit values (warning/alarm) for current, voltage, output, individual settings for each output slot
	Power-saving design, minimal intrinsic power consumption

Features

Technical specifications	Display/controller unit in the PDU enclosure rotatable through 180° and replaceable		
	Integral, fully-redundant power pack, power supply from all phases Error-tolerant PDU power supply redundant across all phases Voltage V, current A, frequency Hz		
	Active power, active energy, apparent power, apparent energy Power factor (cosPhi) and phase angle		
	Zero conductor current measurement/load imbalance detection Fuse monitoring for PDUs with integral fuse		
	Bright TFT display, 128 x 128 pixels (RGB) with back-lighting and energy-saving mode to display output data and basic PDU configuration		
	Position sensors for display rotation and correct PDU representation on the website		
	Multi-colour LEDs (green/amber/red) to indicate switching states and limits per individual output slot Power LED to indicate voltage		
Material	Aluminium section, black anodised Slots: Plastic		
Supply includes	Assembly parts		
Options	Type 3 overvoltage protection with interchangeable arresters while operational, with status monitoring, suitable for integration into PDU enclosure		
	Residual current measurement (type B) per infeed/phase/fuse		
	Monitoring of the optionally available overvoltage protection CMC III CAN bus sensors may be connected for ambient		
	monitoring, max. 16 sensors		
	Other enclosure colours are available		
Measurement functions,	Measurement per phase or infeed		
description	Plus measurement per output slot		
	Powerful CPU (ARM Cortex A8) Digital input (floating contact)		
	Additional alarm output/relay output (changeover contact)		
Dimensions	Width: 44 mm		
	Depth: 70 mm		
	Length: 1,695 mm		
No. of sockets and type	18 x C13 / 12 x C19		

Features

Sockets 18 x C 13 12 x C 19 Rated operating voltage 400 V (AC) Rated current (max.) 16 A Power consumption 11 kW Infeeds Qty.: 1 Phases per infeed: 3~ Length of connection cable 3 m Type of electrical connection CEE Interfaces USB 2.0 port (USB-A) for mass configuration, firmware upodata logging CAN bus interface (RJ 45) for a maximum of 16 ambient s Serial interface RS232 (RJ12) for LTE unit, scripting, CLI Use of own certificates/TLS 1.2 E-mail forwarding in case of alarm (SMTP) User administration including rights management LDAP(S)/Radius/Active Directory connection Syslog server connection (max. 2 servers) Fully redundant Ethernet interface 10/100/1000 Mbit/s Directives EMC Directive 2014/30/EU Low Voltage Directive 2014/35/EU Standards EN 62368-1 EN 61000-3 EN 61000-3 EN 61000-6 EN 62053-21 Protocols Web server (HTTP, HTTPS, SSL) SSH, Telnet, NTP

Compact power distributor for deployment in IT server and network enclosures. Vertical installation in the Zero-U space using the supplied universal brackets for common IT racks. Suitable for tool-free quick assembly in the Rittal VX IT and TS IT racks using the special supplied plug-%-play fastener. Robust aluminium housing with permanently mounted output slots, IEC 60320/C13 or IEC 60320/C19 as well as CEE 7/3 (earthing-pin) and BS 1363 (UK), depending on the type (see below for details). The IEC C13 / C19 output slots can be protected with a lock against unintentional removal of the connectors. Unused slots can be closed with slot covers available as accessories. This precludes an unintentional overloading of individual phases an circuits. The fuse circuits and phases are colour-coded for multiphase PDU variants. A fixed-mounted connection cable with IEC C20 or CEE connector appropriate for the variant makes the PDU available for immediate deployment. The PDU metered plus has extensive measurement functions for the current and power monitoring of each output slot The integral TFT colour display enables the basic configuration setting and quick access to to the electrical consumption data. Two Gigabit network interfaces and the integrated Web server allo remote access and data transmission using various protocols The consumption parameter can be SNMP, OPC-UA, Modbus/TCP. For monitoring the ambient parameters, up to 16 sensors (for example temperature / humidity / smoke / leakage / access) as well as VX IT and TS IT handle systems from the CMC accessories program can be connected to the CAN sensor interface Optinally, an overvoltage protection module (type3) can be placed on the PDU at the infeed; the overvoltage protection module is equipped with arrestors that can be replaced during operation. For intelligent PDUs, the status is monitored via the network interface, the PDU basic has a floating alarm contact for monitoring the overvoltage protection. As option, intelligent PDU

variants can be supplied with an AC/DC sensitive residual current measurement (RCM type B) with up to 6 measurement points. This changes the PDU length and the number of installed slots for each standard length. The warranty for proper operation is 24 months.
