FRIEDHELM LOH GROUP

SK 3312.016 - Fan module For LCP rack/Inline, CW

For increased cooling output. Also redundancy can be achieved or the electrical power consumption can be reduced .

Features

Model No.	SK 3312.016
Product description	To increase the cooling output, individual fan modules can be retro-fitted into the LCPs. Similarly, additional integration makes it possible to generate redundancy or reduce the electrical power consumption of the LCP.
Benefits	Can be connected during operation Tool-free fan module replacement
Function principle	Installation of fan modules in an LCP increases the air performance, and thus, the cooling capacity of the respective variant. If cooling capacity is sufficient, the addition of fan modules can be used to form redundancies. Retrofitting fans in excess of the required air flow can reduce electrical energy consumption, as fans will then operate at a lower speed. The noise level of the device is also significantly reduced.
Supply includes	1 fan unit EC fan Wired ready for connection Assembly components
Packaging unit	1 pc(s).
Net weight	7.22 kg

Features

Gross weight	7.52 kg
Customs tariff number	84145915
ETIM 9	EC000320
ETIM 8	EC000320
ECLASS 8.0	27180716
Product description	SK Fan module, UL, for LCP R15, RAL 9005
