IT 7998.900 - RDC All-in-One container

Ready-to-connect IT infrastructure in a robust container shell, as standardized IT modules including UPS and cooling in a range of output categories for SME, Cloud and Edge applications.

Features

Model No.	IT 7998.900
Product description	Ready-to-connect IT infrastructure in a robust container shell, as standardized IT modules including UPS and cooling in a range of output categories for SME, Cloud and Edge applications.
Benefits	Individual container solutions Predefined Data Center Container variants Predefined components Project planning and complete documentation of all components Short planning phase and delivery time Complete turnkey system
Applications	SME, cloud and Edge applications All-in-one module for both low power categories as well as larger HPC applications, individually adaptable to the required power loss
Function principle	The AIO modules contain the entire infrastructure for the IT equipment, including the uninterrupted power supply. With integrated cooling or ready for connection for infrastructure container or conventional infrastructure depending on the version. In addition to mechanical mounting of the IT equipment in the form of racks, an AIO module additionally contains the power distribution including USP system, cooling system and monitoring components. Depending on the cooling system used, the cooling may already be integrated. The provision of the cooling is separate depending on the cooling system used.
Packaging unit	1 pc(s).
Customs tariff number	85480090
ETIM 9	EC002499
ECLASS 8.0	27180207
