

5X MODIFICATION PROGRAM

Rittal's fully automated 5X Modification program can deliver high-quality enclosure modifications in a matter of days, increasing your productivity

Your path to business profitability can be compromised by modifying enclosures by hand during the build process. This is compounded when you consider replicating hand-drilled holes and cutouts over multiple units. Calculating the extra time it takes your employees to do these activities, the inconsistencies from enclosure to enclosure, and the potential for rough and unfinished edges that can damage accessories or wiring, all adds up to lost profits from every job you do! Now, you can put that lost revenue right back into your business. The Rittal 5X Modification program is designed to assist with streamlining your manufacturing process.

Let Rittal modify your enclosures before you even receive them!

You can go straight to the enclosure assembly process and leverage the added time to add new jobs into your workflow. With our most common wallmount and junction boxes in stock, Rittal can ship your enclosures fast with the cut-outs and drilled holes completed!

This program applies to all customers within 400 miles of our Houston Rapid Design Center.

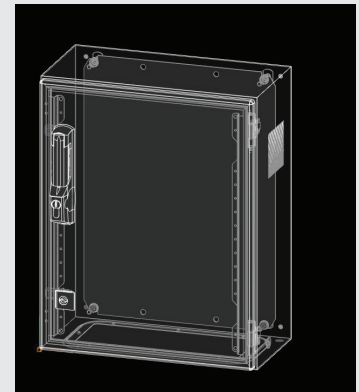

11717 Windfern Rd.
Suite 300
Houston, Texas 77064

What's Included in the program:

- 153 WM and JB's, wallmounts and junction boxes in both stainless and carbon steel.
- Holes, cutouts, tapped holes on mounting panels only - no Assembly, Pems or Studs.
- Up to 5 enclosures, ready to ship in 5 days **or less**.

Required Drawings:

- Fully dimensioned 1 to 1 scale, Rev controlled at time of order. DWG or DXF files are acceptable for the program.
- Only drawings on Rittal cabinets are eligible for the program.
- RICS can allow you to easily place modifications and create drawings on Rittal wallmounts and junction boxes. Go to: <https://www.rittal.us/contents/configuration-selection-tools/>
